FOR IMMEDIATE RELEASE

COMMON CENTS SYSTEMS, INC COMPLETES UPGRADE OF LIMS AT THE GEORGIA STATE PUBLIC HEALTH LABORATORY

Nashville Based Common Cents Systems, Inc. Continues To Solidify Its Presence In The Public Health Laboratory Market

Nashville, TN., April 30, 2009 – Common Cents Systems, Inc. is pleased to announce the recent completion of Laboratory Information Management System (LIMS) implementation at the central laboratory facility of the Georgia Public Health Laboratory. Common Cents Systems implemented M/Lab Enterprise Edition LIMS in the Decatur Georgia laboratory. The implementation further enhances Common Cents System's position as the growing provider of LIMS to public health laboratories.

Rob Ringenberg, CEO of Nashville, TN based Common Cents Systems commented on the close of the project stating that "the company is very pleased to be able to bring the newest version of M/LAB to the Georgia Public Health Laboratory. The technology used by M/LAB Enterprise Edition will be very advantageous to the laboratory in reducing operating costs and increasing the efficiency. The laboratory will also appreciate the amount of flexibility that M/LAB EE has for configuration and maintenance".

The implementation of M/LAB Enterprise Edition involved the departments of Bacteriology, Immunology, Mycobacteriology, Parasitology, and Virology. The company utilized the combined implementation and project management resources from the Sacramento and Nashville offices to complete the project.

M/LAB Enterprise Edition offers more out of the box flexibility than other competitive LIMS in the market place. With many of the features that other vendors consider "add-ons", the seamless integration in MLAB Enterprise Edition allows the technical lab staff to concentrate on the quality of testing while utilizing the streamlined workflow to improve result turnaround time and decrease cost.

M/LAB Enterprise Edition is a comprehensive Laboratory Information System that is designed to provide laboratories with an efficient and flexible workflow in a configurable off the shelf package. M/LAB Enterprise Edition can be tailored to meet the needs of a wide variety of laboratories and has been implemented in public health laboratories throughout North America and the Caribbean.

About Georgia State Public Health Laboratory

The mission of the Georgia State Public Health Laboratory is to provide screening, diagnostic and reference laboratory services to citizens of the State through county health departments, public health clinics, physicians, hospitals and state agencies. The Georgia Public Health Laboratory includes the Central Laboratory facility in Decatur (Metro Atlanta), and two Regional Laboratories located in Albany and Waycross.

About Common Cents Systems

Founded in 1987, Common Cents Systems, Inc. is a privately held corporation that serves the healthcare community as a developer of commercial Laboratory Information Management Systems (LIMS). Common Cents Systems has spent the last 21 years successfully partnering with laboratories and clinics across the United States and the Caribbean. In 2006 Common Cents Systems, Inc. acquired M/Mgmt Systems, Inc. (a California Corporation located in Sacramento). The acquisition of M/Mgmt by Common Cents Systems offers a unique opportunity for both companies and to their customers. Common Cents Systems operates offices in Nashville, TN and Sacramento, CA.
